

Minutes of Environmental Public Hearing in respect of proposed M/s. Lanco Vidarbha Thermal Power Ltd. the proposed 1320MW(660X2) Coal based Thermal Power Project at Village Mandwa,Pulai & Belgaon, Tq.Dist. Wardha .

Environmental Public Hearing in respect of **M/s. Lanco Vidarbha Thermal Power Ltd. the proposed 1320MW(660X2) Coal based Thermal Power Project at Village Mandwa,Pulai & Belgaon, Tq.Dist. Wardha** was held on 17th September 2010 at 12.15 hrs. at Project's proposed site, Near 11th Mile Stone, Belgaon-Mandwa Road,Mandwa, Tq. & Dist. Wardha under the Chairmanship of Shri. Avinash Katade, Sub-Divisional Officer / Magistrate (The representative nominated by the District Collector, Wardha). Shri. A.T. Fulmali, Regional Officer, M.P.C. Board, Nagpur was the member of the public hearing panel and Shri. N.G.Nihul, Sub-Regional Officer-II, M.P.C. Board, Nagpur act as a convener. The Public Hearing started at 12.15 hrs. with the permission of the Chairman of the Public Hearing Panel.

First of all, the Convener welcome to all of present for the Public Hearing. He told that, the Public Hearing is being conducted as per the provisions of EIA Notification dtd. 14th September 2006 and amended Notification dtd. 1st December 2009 of Ministry of Environment and Forest, New Delhi. The project proponent after receipt of terms of reference from MoEF, New Delhi for this project on 26th August, 2009, has submitted their application dtd. 7th August, 2010 to the Board requesting for conducting the public hearing. Accordingly, the Board has issued public notice on dtd. 14/08/2010 in Daily Lokmat (Marathi) and Daily Hitwada (English) and Corrigendum in Daily Lokmat dated 17.08.2010, the date of public hearing was scheduled on 17/7/2010. The copies of draft EIA and Executive Summaries in English and Marathi were kept at the offices of District Collector, Wardha, District Industries Centre, Wardha, Zilla Parishad, Wardha, M.P.C. Board (HQ), Mumbai, Regional Office & Sub-Regional Office-II, M.P.C. Board, Nagpur, Environment Department, Mantralaya, Mumbai, Regional Office, MoEF, Bhopal and Offices of the concerned Grampanchayats namely Mandwa, Pulai & Belgaon. Also told that the information about the project was placed on the Website of the M.P.C.Board. The Member Secretary, M.P.C.Board,Mumbai has issued the panel order no. E-68 Of 2010, dated 27/8/2010 for the Public Hearing.

Convener of the Public Hearing further informed to the participants that, so far 152 nos. of written representations were received and the copies of the same are made available to the project proponent. He further appealed to the participants that, they can file their written objections/representations during Public Hearing and they could raise their oral objections after the power point presentation that will be given by the project proponent. He further clarified to the participants that the Public Hearing panel is not here to accord Environmental Clearance to the project, but for recording the objections / suggestions of the participants, which will be video graphed and will be submitted to the MoEF, New Delhi for further necessary action.

The convener, with the permission of Chairperson, then requested the project proponent to present their power point presentation One of the participant has enquired that, Why District Collector is not present for Public Hearing? As such important issue is going to be discussed here.

The Chairperson of the Public Hearing has clarified that, he has been authorized by the District Collector, Wardha as Chairperson for this Public Hearing. He further clarified that, this Public Hearing is meant for recording views of the participants about the project.

Thereafter representative of the project proponent has started their power point presentation and given the information about the project in local language, Marathi.

He has given the information regarding the projects undertaken by the Lanco group, silent features of this proposed 1320 MW(660X2) Coal based Thermal Power Plant project at village Mandwa,Pulai & Belgaon in Taluka and district Wardha. He told that, the Capital Investment of the project is Rs.6936 Corers. He has given information about the location of the project. Coal consumption will be 7.5 Million Ton/Annum and it will be brought from Coal Mines from Chhattisgarh & Coal linkage allotment letter is procured. He further told that, the water required for the project will be 3858 m3/hr. and it will be obtained from Lower Wardha Project. Project proponent has entered into agreement with Vidarbha Irrigation Development Corporation in this behalf. He has further given the information regarding requirement of 483.57 Hectares of land for the project, Terms of Reference obtained from MoEF, New Delhi, Consultant nominated for preparing Environmental Impact Assessment Report(EIA), Power Purchase agreement with MSEDCL, Details of EIA study as given in the EIA Report which includes baseline Environmental status, Environmental Monitoring Program, Anticipated Environmental Impacts and Mitigation Measures, Environment Management Plan for Water, Air, Noise, Solid Waste Management, Ash Handling Management & Green Belt development on 290 Acres of land etc., Technology of the Project, Risk Assessment and Disaster Management Plan, Ecological Management, Cost provision (Rs.415 Crores) for Environmental measures, Project benefits, Socio-Economic Impacts, Corporate Social Responsibility Program etc. He told that the required Pollution Control Measures are proposed for the project and hence there will not be adverse impact on the Environment around the project site.

Chairperson of the Public Hearing has stated that, this Public Hearing is for recording the views/objections/suggestions of the participants regarding the project. The same will be communicated to the Government. He also clarified that this Panel is not here to take decision for according any approval to the Project. He then requested the participants to express their views.

Following participants have expressed their views about the project. The details are as under:

1. Hon'ble Mr. Datta Meghe, Member of Parliament (Wardha Loksabha)

At the outset Mr. Datta Meghe expressed that he is not against the project and never opposed to any industrial projects in Vidharbha region. He said that the purpose of this Public Hearing is mainly to understand the project

with respect to pollution aspects. He expressed that company is promising about 600 persons for likely employment in such large project, but they may actually take only 50 persons from this area and others will be from other state like Bihar, Uttar Pradesh etc. which may cause unhappiness among the local peoples.

In this project, annually 75 lakh Ton of Coal will be used and about 40 lakhs Ton of ash will be generated in a year. Company has planned to achieve 100% of ash utilization within 4 years from commissioning of the project. What about the ash generated in first three years? What will happen to the stored ash in the ash pond? Company has not made any agreement with the Cement industries for lifting of the ash. He wanted to know about the agreement signed with Cement industries. He said that Chandrapur in Maharashtra State is ranked 4th most polluted area in India. The ash emitted out of the stack will spread in 25 km area and may pollute drinking Water and agricultural fields and cause health problems like Cancer and TB. This project may be the cause to disturb the ecological balance of the area.

As per the Government rules, no farmers should become landless after acquisition of land. He said in this project, about 90% farmers would become landless. It seems company has not done any provision for providing the employment to these affected farmers or their next generation.

In this project, 4288 m³/hr water allocated by VIDC from Lower Wardha Dam against the actual requirement of 2858 m³/hr. He wanted to know from which quota the project has been allocated the Water, when only 10 million m³ per annum of water is reserved for industrial use from Lower Wardha Dam. The decision of allocation of Water for this project could adversely affect the irrigation in this area. He also stated that, the temperature of this area is already on higher side and by putting such Thermal Power projects, there will be increased in the temperature of the area. He also lamented that why such Thermal Power projects are proposed to setup in Vidarbha? Why not it is established in other area like Chattisgarh, Andhra Pradesh?. He further told that, the funds of Rs. 50 Crores is reserved for plantation by the project proponent, but details of tree plantation has been not given in the report. He also told that, there is no details of distribution of Electricity. It is necessary to have agreement in this behalf. As per the guidelines, the public hearing should be conducted under the Chairmanship of District Collector or Additional Collector only, which is not observed here. He further told that, whatever commitments for control of pollution made by the project proponent should be implemented effectively. He is in Politics and social work since last 35 years and observed that it is not happen, in general and hence opposing the pollution that may cause due to the project. He further told that, the

farmers present here should know that, He came here for not to oppose the project, but they should think about impact of the project. He has given written representation also.

2 Prof. Mr. Bhasker Ithape, Social worker, Wardha

He said that, the poor people of this area have been deceived by the company by acquiring the land at the rate of Rs. 2.0 Lakh per acre.

After this one of the participant objected the statement of Mr. Ithape stating that this is the Public Hearing where the issues regarding Environment should only be raised.

Some of the participants jointly told that this is also one of the issue related to social environment and everyone has right to express their views.

3. Mr. Manoj Manwatkar & Milind Manwakar ,Pulai.

He raised objection by stating that the Grampanchayat has granted NOC to the project without taking all villagers in the confidence.

On the statements of Mr. Ithape and Mr.Milind Manwatkar some of the participants started shouting and resisted to make Political Statements which are not related to Public Hearing. The Police Officer present has requested the participants to maintain the discipline and peacefully express their views one by one. Some of the statement made by the Police Officer which seems to be in favour of the project, is objected by some of the participants and started shouting. Chairman, Member & Convener of the Public Hearing appealed to the Public to keep silence and to express their views peacefully which would be recorded and submitted to the Central Government. On this appeal, participants responded positively and come forward for expressing their views.

4. Mr. Vivek Mathane,Environmentalist.

He told that, the participants of the Public Hearing listen the details given by the project proponent through power point presentation. Now, the other side of the project should also be heard peacefully by the Public, which will be described by the environmentalist and others.

5. Mr. Ramkrishn Bhalerao, Farmer, Pulai , Dist. Wardha.

He said that the information about the project was not made available to him. My village is about ½ km from the project site in east direction. The water flow is towards east direction. So the maximum effect of pollution will be in his village. The villagers are deceived and this is problem of survival for all the farmers in this village. Company has not given any assurance in this regard. We are not opposing the project but we need written assurance from the company in this regard.

It is to be noted that the Grampanchayat has issued the NOC without taking the people of the village in to confidence. I oppose the Grampanchayat for hiding the documents. If one person is benefited by this project does not mean that the whole village is benefited.

6 Mr. Nitesh Kharabe, Mandwa, Dist. Wardha

He referred to Mr. Datta Meghe's statement, that only thermal power projects are coming in Vidharbha region and not other industries like automobile and computers. He would like to ask Mr. Datta Meghe, what he has done in last five tenures of his Member of Parliament (MP)? The leaders of this area have not done anything good to us. If company is coming forward to help us, why these leaders are opposing the project? We support the project and request company officials to make the affidavit of our demands and request to compensate the farmers whose lands are bought at lower rate by giving average rate.

We peacefully came to attend the public hearing. However, some people who were opposing the project started disturbing the proceedings of the meeting by tearing off the attendance register and we only tried to stop them from doing so.

7 Mr. Sunil Gafat, Mandwa, Dist. Wardha

He said that we have not come here only to support the project but to understand the impact of this project on the environment and health of the people. We, on behalf of three villages (Mandwa, Pulai and Belgaon village) have prepared one agenda on our demands and will get them fulfilled by the company. In this regard we will get the agreement from the company.

8 Mr. Pradeep Kale, Zillha Parishad Member, Watoda ,Dist. Wardha

He said, I am a resident of the Rehabilitated area of Lower Wardha Dam project, which is a water source of the proposed power project. During construction of the Dam, our lands were acquired at the rate of Rs. 18000/- per acre and further revised to Rs. 50000/- per acre. However, today's market rate of that land is about Rs. 5.0 lakhs per acre. The dam is mainly meant for

agricultural purpose and was constructed by tax payer's money. Now by utilizing this water in the power plant and laying 30 km pipeline in our good agricultural land, company will be making huge profits.

9 Mr. Vijay Muley, Ex Member of Parliament, Wardha.

He said, he is not opposing the project. However, the wrong information is given in EIA report. It is wrongly stated that there are no reserve forests in 10km area but according to him there are 15 places are reserved for forest located within 10-km area. It is also stated in the report that there are no historical monuments, but one Narsamai temple is located in the 10 km area which is visited by many pilgrims. The project will pollute these forests and temple. The 100% of ash utilization is not possible. The company has said that about 600 jobs will be created due to the project. But, in reality, even 50 local peoples will not get the jobs and most of the people will come from Bihar, West Bengal and Andhra Pradesh as locals are not adequately qualified and do not have required expertise.

On this some of the villagers interrupted Mr.Muley and told that our villages have no. of qualified persons who have an opportunity to get employment in the project.

Representative of the Project Proponent told that, report says that there are 13 Reserved Forest and Protected Forest in the study area. However, there are no wildlife sanctuary, National Parks and monuments notified by Archeological Department.

10 Mr. Nitin Sarate, Mandwa, Dist.Wardha.

He said the purpose of this public hearing should be understood and allows to conduct smoothly. The views expressed in this meeting will be noted and submitted to the Government. We are not politicians and this is not political platform to raise political issues. Please stop taking up political issues and request villagers to express their views. He also demanded that the jurisdiction within which the proposed project is going to setup should be given preference to express their views and not the politicians.

11 Mr. Vilas Parimal, Mandwa, Dist.Wardha.

He said he has visited Lanco power project in Korba to see the effect of the Thermal Power Plant. In the presentation, I noticed some difference between existing Lanco plant at Korba and proposed Power Plant in Mandwa. In this proposed plant, details of ESP to control dust emission is not given, which was seen in Korba plant. In Korba, HCSD system is used for disposal

of ash and there is no mention of the same in this proposed project. Kindly clarify;

Representative of project proponent replied that, the ESP of 99.9 % efficiency will installed in this proposed project also as done in Korba project.

12 Ms. Seema Sahoo, Nagpur.

She said she is not opposing the project. In the EIA report, it is wrongly stated that, in study area there is no agricultural land and no hills. The maximum temperature of the area is wrongly mentioned since the in summer season the temperature is very high. The flora & fauna reported in EIA is 10 year old data and fresh study need to be conducted by Government agency. It is mentioned that 600 people will get employment but it is not mentioned how many local peoples will be given the employment. The land use given in the report is 10 year old and shown the land as barren land. How much land will be acquired for the pipeline corridor? It is stated that 1500 trees per ha, plantation will be carried out, the location of the plantation is not shown. The wild life conservation plan is not prepared.

Representative of project proponent replied that, the EIA report is prepared based on one non-monsoon season from 1st October to 31st December 2009 as per EIA guidelines. In the study area there are no hills but some small hillocks are present. In the study area, the wildlife plan is not prepared as there are no Schedule-I.

The Census report of 2001 is referred for the land use which is authentic document. The greenbelt will be developed along the plant and ash pond boundary and same is shown in the layout plan. The area earmarked for the greenbelt is 290 acres. In addition, plantation will be done along the road side and available vacant land in the villages.

Representative of project proponent also replied to the query regarding employment. He told that the local population will be given the preference. The suitable candidates in the surrounding villages will be trained in ITI for skill development and employment will be provided in the project. The technically qualified people who are working away from their native village and want to come back will also be given the preference.

13 Mr. Sudhir Paliwal, Nagpur.

He said this is not the only power plant coming up in Vidharbha region, other Thermal Power Plants are also proposed in this region. Presently, 3900 MW power is generated in Vidharbha and 2757 MW is transmitted out to different states. The power demand of Vidharbha is 1200 MW and so there is

no need for the power plant in Vidharbha. There is no Coal but still the Power Plants are proposed here because of availability of the water and land. The Coal will be either brought from Chhattisgarh, Orrisa or from foreign countries. In Vidharbha, we do not need big Power Plant. We need only small size Power Plants which have lower pollution level. Recently Ms. Sonia Gandhi has said that no agricultural land shall be used for industrial development.

He wanted to know from the project proponent that where this electricity will be supplied? How the farmers will be compensated, whose land will be used for power transmission line? How the farmers of this area will be compensated in case of losses due to the thermal power plant? Where is FORM-1? In this Form-1, company is required to give undertaking for the compensation to the villagers for loss of their agricultural yield. The fly ash utilization details are not given in the report. In Korba, all the ash ponds are located on the banks of the river. During rainy season, the ash is allowed to flow in the river to reduce the burden of ash in the ash pond. Further, the Indian Coal is very dangerous since mercury and radioactive substances are present. The disaster management plan does not mention what will happen if ESP fails. The incremental concentrations of pollutants are compared with limits applicable for residential zone and not with the sensitive zone.

The desulphurization plant is not proposed in the project to bring down the gaseous emissions. He talks about acid rains due to SO₂ emission, global warming, climate change due to CO₂ emission cause due to Thermal Power Plants.

The maximum water used in power plant is lost in evaporation. The Vidharbha is more concerned about availability of water. In this regard air cooled system should be used so that significant quantity of water can be conserved.

Representative of project proponent told that Power Purchase Agreement (PPA) is signed with MSDCL for the supply of 680 MW of power for 25 years. The PPA for the balance power will be signed in future.

Another Representative of project proponent has told that the FORM-1 was submitted to MoEF to obtain approved TOR. Based on the TOR the EIA report is prepared.

He further told that during failure of ESP, the boilers will shut down automatically and there will be no discharge of dust. If this is not adhered to, MoEF, CPCB & MPCB have authority to initiate action against the defaulting industries.

Similarly, He clarified that in the layout plan as per guidelines, space is provided for installation of Desulphurization plant. In future, if situation warrants, it will be installed.

Representative of project proponent told that as mentioned by Shri. Paliwal about small size power plants, the Super Critical Boilers are not available in smaller capacity. In the proposed project Super critical Boilers will be installed, which has better efficiency and lower emissions. The ESP are designed to meet the particulate matter emission below 50 mg/Nm³.

14 Mr. Sarang Khedakar, Mechanical Engineer, Mandwa, Dist.Wardha.

He said that the information given in the presentation is OK. If some of the previous speakers are really concerned about environment, why they have not approached the villagers and explained about pollution well in advance?

He further said that if Company is supporting the capable students in education, we will support the project. To make common villagers to understand the information exchanged during this presentation, we request project proponent to kindly arrange a meeting in our villages and explain merits and demerits of the project. The greenbelt development can be undertaken immediately in the earmarked area and in the vacant land available in villages. We have already given our representations in writing to MPCB. He also told that ,the local people should get preference in the employment irrespective of any recommendation from Politicians.

Representative of project proponent told that, if any engineer of your village working out side the village and wants to return back, he will be given the preference in the employment. We will sponsor the scholarship to the eligible students. The greenbelt will be developed and if required we will also plant the trees along the roads and vacant land in the villages.

15 Mr. Ganesh Gayaki, Ex. Sarpanch, Pulai, Dist.Wardha.

He said that his agricultural land is near the plant boundary. In case his land loses fertility in future due to the pollution from the project, what will happen and how it will be compensated.

Representative of project proponent told that the land will not undergo any change in fertility due to the project, if any noticed, will be corrected and solved.

Chairman of the public hearing has told to the participants that the issues raised by the participants are noted and will be incorporated in the minutes and will be forwarded to the concerned for further necessary action and declared that the Public Hearing is concluded.

The representations/objections received before and during the public hearing are **193** in Nos. Which are as under;

Sr. No.	Views/ Objections / Representation submitted by	Date
1.	Shri Chandrashekar Dadaji Bhende, Wardha	04/09/2010
